Member of British Association of Occupational Therapists in Independent Practice

Professional experience

I graduated from Cardiff in 1988 and completed an elective placement in North America. In 1990 I began working at Pinderfields Hospital in Neurological Medicine, gaining considerable experience in acute neurological care and inpatient neurological rehabilitation. In 1994 I started as a Senior Occupational Therapist at The Priory, Highbank, working for four years as a member of the interdisciplinary team that provides inpatient rehabilitation for adults with acquired brain injury. I became Lead Occupational Therapist in 1998 completing a Masters' degree in Occupational Therapy. Joining the senior management team in 2000, I had responsibility for the transitional living service providing inpatient and outreach rehabilitation. I set up A Chance for Life Ltd in 2002, providing Complex Case Management and Rehabilitation and the provision of specialist support services for children and adults in their own homes. In 2003, I developed Lancashire and Cumbria's pathway for acquired brain injury rehabilitation. Since 2005 I have been working full time as a Case Manager, Care Expert and Director of A Chance for Life Ltd. I am an active member of North Cumbria Headway and a committee member of the Northern Acquired Brain Injury Forum (NABIF). In June 2018 I was co-opted to join the BABICM Council (British Association of Brain Injury Case Managers).

I have experience in the following areas:

- Complex Needs Assessments and Risk Assessments
- Inpatient and Community Rehabilitation Care Packages
- Establishing complex care packages in the community
- Support Worker recruitment, training and employment
- House adaptation and equipment provision
- Care Expert Reports
- Facilitation of patient discharge to the community
